## SUMMARY

Results-driven **Software Engineer** specializing in **React, Node.js, Golang** and **TypeScript**, delivering scalable, high-performance applications with **microservices, AWS**, and event-driven architectures across Web3 and enterprise platforms.

## TECHNICAL SKILLS

- **Frontend Development Technologies:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Redux Toolkit, React Query, Zustand, React Router, Vite.
- **Backend Development Languages & Frameworks:** Node.js, Nest.js, Express.js, Golang, Fiber, RabbitMQ, Kafka, gRPC, Temporal, Redis.
- **Cloud & DevOps Cloud Services:** AWS (S3, EC2, Lambda, Amplify), Docker, Git, GitHub, Bitbucket, Linux, Nginx.
- **Database Management Databases:** MongoDB, MySQL.
- **Microservices Architecture Key Components:** API Gateway, workflow orchestration, Distributed tracing, Centralized logging.

## WORK EXPERIENCE

### **Associate Software Engineer, Antier Solutions Private Limited**

**May 2024 - March 2025**

Led a team of developers to deliver large-scale Web3, ICO platforms, and asset tokenization projects, focusing on scalability, security, and performance.

#### **Key Contributions**

- **Frontend Engineering:** Migrated applications from CSR to SSR (Next.js), reducing load times and improving SEO. Delivered high-performance UIs for Biochar, Ozolio, Bingold, and Valuelt using React.js/Next.js.
- **Cloud & DevOps:** Architected AWS-based solutions with high availability, fault tolerance, and cost efficiency, optimizing throughput with Redis caching and MySQL/MongoDB.
- **Microservices & Scalability:** Built low-latency, high-performance services using NestJS, Node.js, gRPC, and RabbitMQ, implementing Saga orchestration for workflows serving millions of users. Developed durable wallet systems and resilient distributed transactions.

### **Software Engineer, Lancesoft India Private Limited**

**April 2025 - Current**

Focused primarily on frontend development with a strong emphasis on creating responsive and user-friendly interfaces, while making small but impactful contributions to backend microservices.

#### **Key Contributions**

- **Frontend Engineering :** Designed and developed responsive, high-performance user interfaces for a staffing platform using React.js, TypeScript, Tailwind CSS, React Query, and Redux Toolkit, leveraging AWS Amplify for scalability and significantly improving load times and SEO.
- **Backend & Microservices :** Built a Golang microservice leveraging Pdfbox/AWS Textract and OpenAI API to parse text from PDF resumes and generate automated resume score matching.

## PROJECTS

### **Biochar Development ( Antier Solution Private Limited )**

- Led CSR-to-SSR migration, reducing page load times by 30% and improving SEO, Architected microservices for wallet creation and distributed transactions.

### **HummingBird ( Lancesoft India Private Limited )**

- Optimized a staffing platform using React.js and TypeScript; enhanced UI performance and code efficiency through best practices, AWS Amplify scaling.
- Enhanced frontend security by implementing Content Security Policy (CSP) headers and sanitizing user inputs to prevent Cross-Site Scripting (XSS) attacks.

## EDUCATION

### **Bachelor of Computer Applications (BCA)**

Indira gandhi national open university  
CGPA: 7.0/10.0

### **Master of Computer Applications (MCA)**

Chandigarh University (Online)  
Expected June 2027 | CGPA: 9.0/10.0
